

Hyperlift's Stars Insights Engine

Perform like a five-star plan overnight

Just like five-star plans, our technology gives your team the capabilities to generate the highest ROI possible – without the time and resources typically required. Instantly understand how you perform against specific peer groups, which measures will drive the most value and why, and where you should invest your finite intervention resources to drive the biggest impact.

Hyperlift's Stars Insights Engine is the most comprehensive data, analytics and predictive modeling solution for plans seeking to improve Medicare Star ratings. Using data science and machine learning, Hyperlift gives Stars management teams and analytics professionals unprecedented perspective to make critical decisions.

STARS INSIGHTS ENGINE

In an easy-to-use SaaS solution, the Stars Insights Engine includes everything you need to adapt to new information quickly throughout the year:

- Detailed measure assessments for all contracts
- Immediate scenario modeling
- Prioritized measures and performance targets
- Targets evaluated against current trend data
- Identification of near- and long-term intervention opportunities
- Enable the creation of clear and compelling business case justification

Access a powerful set of capabilities. Today.

HOW IT WORKS

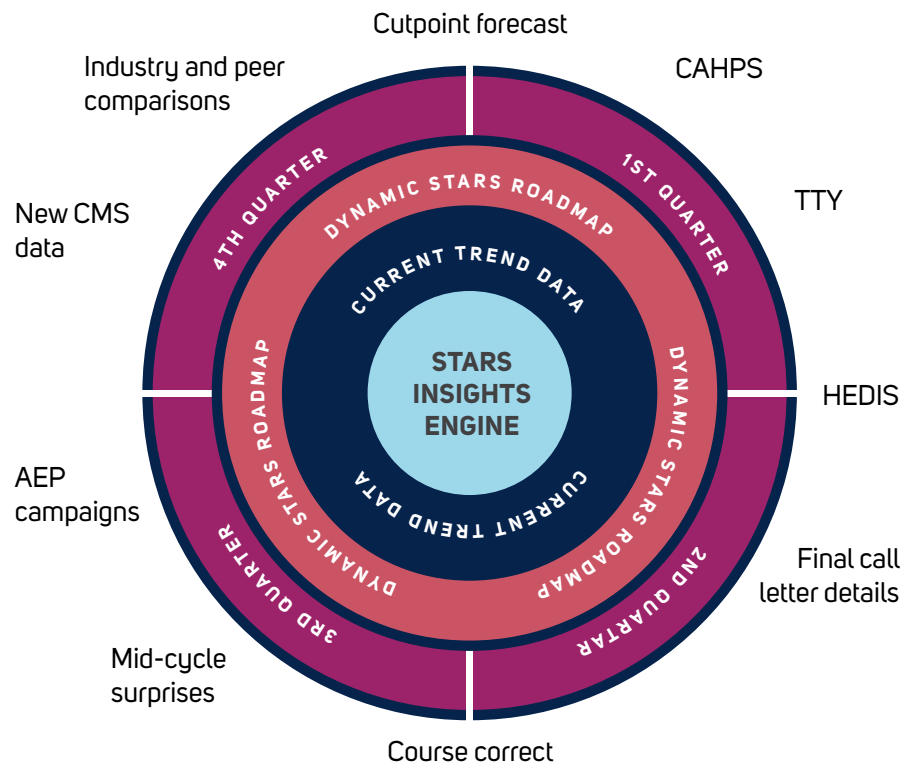

Simply log in to the Stars Insights Engine and begin accessing value immediately. Plan a roadmap that's custom fit to address your unique challenges and strategic situation, no matter what time of year you begin. Then layer in new trend data with ease to reforecast and refocus resources.

Hyperlift's sophisticated modeling approach layers cleansed CMS data, proprietary predictive models and algorithms, and current trend data to support the development of a Strategic Stars Roadmap. This roadmap is the starting place for a year-round iterative approach to managing Stars performance.

FOCUS ON THE RIGHT MEASURES YEAR-ROUND

Staying focused on the right activities at the right time is critical to achieve or exceed your projections. Adapt and take advantage of insights quickly derived from new trend data as it comes in throughout the year.
