# Measure-Based Performance Targets

To establish our performance targets for Stars 2021, we used a detailed data-driven starting point to identify what measure movement has been demonstrated in market by plans performing in our range on a measure-by-measure basis. We combined that with our Stars team's internal knowledge to identify realistic and achievable targets.

We selected all plans that scored in our performance range for each measures in Stars 2018 and evaluated the measure movement that was demonstrated on each of those plans between Stars 2018 and Stars 2019.

Based on reviewing the measure movement that was demonstrated and what we know internally about what is happening in our contract, we established performance targets we are confident we can deliver.

*The peer group we used for comparison purposes was the average measure score of all contracts that were rated 4-Stars or higher overall.*

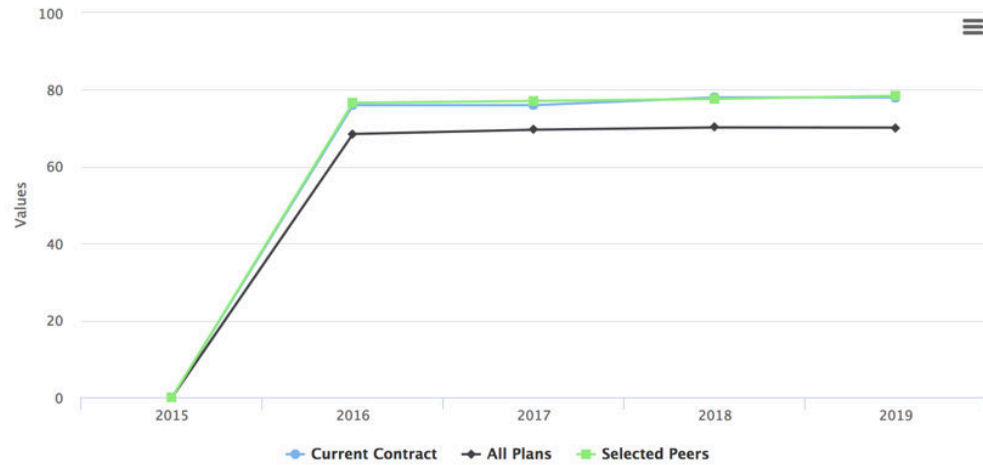

The results are below.
